

# SONALI CHAUHAN

## Full Stack Developer | Application Engineer

Faridabad, Delhi NCR | 7247825776 | Sonalichauhan20532@gmail.com | LinkedIn | Portfolio

### PROFESSIONAL SUMMARY

---

Results-driven Full Stack / Application Engineer with 4+ years of experience building scalable B2B and B2C travel technology platforms. Currently at Sriggle Tech Pvt. Ltd., developing Signature Travel Software — a cloud-based Travel ERP serving travel agencies and tour operators. Skilled across React.js, Next.js, .NET Core, .NET MVC, SQL, REST API integration, and payment gateway workflows. Delivered 5+ white-label travel portals with real-time booking, flight, hotel, and holiday package modules. Proven track record of improving performance and ensuring cross-browser compatibility in production environments.

### KEY SKILLS

---

- React.js, Next.js, Node.js
- HTML5, CSS3, Tailwind CSS
- Redux (State Management)
- JavaScript (ES6+), TypeScript
- REST API Integration
- .NET Core, .NET MVC, C#
- SQL (Stored Procedures, Joins, CTEs, Query Optimization)
- Git & Version Control
- MongoDB, NodeJS
- Performance Optimization

### PROFESSIONAL EXPERIENCE

---

#### **Sriggle Tech Pvt. Ltd. — Faridabad, Delhi NCR**

*Application Engineer*

Dec 2023 – Present

- Developed and maintained B2B & B2C travel booking platforms with responsive UI using React.js, JavaScript, HTML5, CSS3, and Tailwind CSS
- Built 5+ white-label travel portals including hotel booking, flight reservation, holiday packages, and transfer booking systems
- Integrated 10+ third-party travel APIs (GDS/aggregators) for real-time availability and pricing data
- Implemented secure payment gateway workflows, reducing checkout errors by ~20% through improved UI validation
- Built reusable component library, reducing development time by 30% across portal projects
- Developed quotation systems and reservation management modules used daily by 50+ travel agents
- Optimized application performance — improved page load time by 25% through lazy loading and code splitting
- Collaborated with backend and QA teams for stable production releases with zero critical bugs post-launch

#### **LetsCms Pvt. Ltd. — Aligarh, Uttar Pradesh**

*Frontend Developer*

Sep 2021 – Dec 2023

- Designed and developed responsive e-commerce web applications using React.js and Next.js with mobile-first approach
- Implemented server-side rendering (SSR) with Next.js, improving SEO scores by 40% and page load performance
- Integrated RESTful APIs for dynamic product catalog, cart, and order management features
- Built full-scale dynamic e-commerce website with MLM plan including product categorization and management system
- Applied form validation and UI-level security best practices across all user-facing modules

- Worked closely with backend teams to integrate APIs, manage application state, and improve user experience

## KEY PROJECTS

---

### **Signature Travel Software**

Cloud-based Travel ERP and booking management platform for travel agencies and tour operators. Modules: Flight Booking, Hotel Booking, Holiday Packages, B2B & B2C Portals, Reservation Management, Travel API Integrations, Payment Gateway, Booking & Cancellation Management.

### **E-commerce Website with MLM Plan**

Full-scale dynamic e-commerce platform with multi-level marketing plan. Features include product categorization, order management, user roles, and performance-optimized frontend.

## EDUCATION

---

### **Bachelor of Technology (B.Tech) — Computer Science**

Institute of Technology & Management, Aligarh | 2016 – 2020
